

How to make a Crossword with JCross

a. The title for your exercise should be entered in this box.

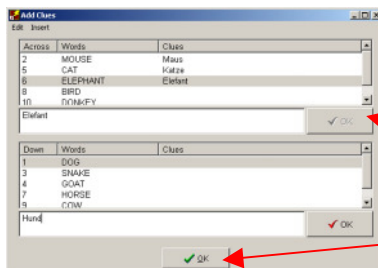

b. Click here to enter the Automatic Grid Maker

Automatic Grid Maker

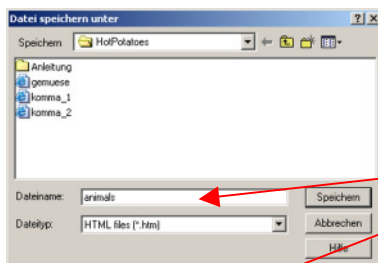

This tool makes a crossword on its own! You just have to enter the words you want to ask for. Please enter each word in a separate line! When you are finished click

Make the grid

Add Clues

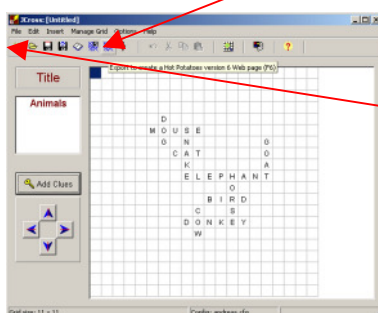

Enter the clues (or questions) for all of your words. Click the **OK button** on the right after each clue. When you are finished, click the **OK button** at the bottom of the screen.

Create Webpage

Click on this button to create a webpage. You just have to enter a name for your crossword and the directory to save it in, for example: disk a:\ or your USB-Stick.

Remember that you have to use Microsoft Internet Explorer® to try the finished crossword.

Print Crossword

Got to **File** and click **Export for Printing**. The Internet Explorer® should open. Copy the whole page by pressing first **Strg + A** and then **Strg + C**. Open a new Word document and push **Strg + V**.

If you like, you can enter additional text. You can print the crossword by pressing the **print-button** or **Strg + P**.

Doing crosswords is a lot of fun, making them is easy and even more fun!

Make a crossword together with your partner according to your task, print them and store them on floppy disk.

Start the program JCross by going on Start → Programme → Hotpotatoes and click JCross. You have to use your books, ask your teacher when you have questions.
